## **Five Star! The Laurels of Summit Ridge Earns Quality Measures Recognition from CMS**

*Skilled nursing facility receives top rating for commitment to guests' physical and clinical needs*

**ASHEVILLE, N.C.** – The Laurels of Summit Ridge, a skilled nursing and rehabilitation center operated by Laurel Health Care Company, has been recognized as a five-star performer in *Quality Measures* by the Centers of Medicare & Medicaid Services (CMS) in the most recent set of data released through its Five-Star Quality Rating System.

The quality measures rating, which includes data on 17 different physical and clinical measures for skilled nursing facility residents and offers information about how well nursing homes are caring for their guests' physical and clinical needs, is one of three broad categories reviewed within the CMS Five-Star Quality Rating System, a tool that helps consumers select and compare skilled nursing care centers. Facilities receive grades on quality measures, staffing (including registered nurse staffing), health inspections and overall quality on a scale of one to five stars, with the overall quality rating encompassing elements of each category. Nursing homes receiving five stars are considered to offer much above average quality services, while nursing homes with one star are considered to have quality much below average.

"The Laurels of Summit Ridge is excited to be named a five-star facility in quality measures by CMS," administrator Jacob Mauer said. "We place tremendous value in the quality measures category as it accounts for how well we are taking care of our guests' needs while they are in our care. Our associates have worked extremely hard in their pursuit of high standards of care and service and this recognition is validation of that hard work."

The Laurels of Summit Ridge makes the jump to a five-star grade in quality measures in the most survey after three consecutive four-star reviews. The facility is also regularly recognized as a four-star performer in staffing by CMS.
