

Statement to Interested Parties – April 12, 2020

“We are thankful to UNC Health for its assistance in providing facility-wide COVID-19 testing for all residents and employees of The Laurels of Chatham. As expected, the universal testing – which included testing of asymptomatic individuals – resulted in additional positive cases at the facility. To protect privacy, no additional information about the confirmed cases will be shared.

We empathize with those affected and will do everything we can to support and protect them. The safety and well-being of our residents, employees and their families is our absolute top priority. We will continue our care and services according to Centers for Disease Control & Prevention guidance and in collaboration with the Chatham County Public Health Department.

All of us at The Laurels are humbled by the overwhelming support we have received from the Pittsboro community and we remain appreciative of everyone’s cooperation and understanding.”

Rob Peck

Regional Director of Operations, Laurel Health Care Company
